

Northrop Grumman–Led Team Submits Bid for Lawrence Livermore National Laboratory Contract

New management perhaps?

News Release Northrop–Grumman Ltd
October 27, 2006

Northrop Grumman Corporation (NYSE:NOC) announced today it has submitted a bid to the Department of Energy National Nuclear Security Administration (DOE–NNSA) to lead the management and operations at the Lawrence Livermore National Laboratory (LLNL) in Livermore, Calif.

Northrop Grumman is the majority member of Advanced Science and Engineering Technologies, LLC a joint venture formed by leaders in the federal contracting industry to pursue the LLNL contract. Member firms include AECOM Government Services Inc., CH2M Hill Constructors, Inc., Wackenhut Services, Inc. and Nuclear Fuel Services, Inc.

Team members were selected for their experience in supporting the Department of Energy and other federal clients in technology development, environmental management and national security. The group has worked throughout the past year to craft an innovative proposal for providing NNSA with realistic solutions for meeting the laboratory's critical work requirements today and well into the future.

"NNSA and the public expect a high degree of accountability, performance, and safety from the national laboratories, especially those entrusted to maintain and certify our nation's nuclear stockpile," said Ronald Sugar, Northrop Grumman chairman and chief executive officer. "Our team has an established track record of successfully working with complex science and technology. We look forward to proving that we're the best choice."

Northrop Grumman Corporation is a global defense company headquartered in Los Angeles, Calif. Northrop Grumman provides technologically advanced, innovative products, services and solutions in systems integration, defense electronics, information technology, advanced aircraft, shipbuilding and space technology. Northrop Grumman serves U.S. and international military, government and commercial customers with more than 120,000 employees and operations in all 50 states and 25 countries.
